#### Opening prayer of gratitude

... already 141 days since True Mother has been walking the path of struggle. We with hearts of loyalty and longing for our True Mother's swift return to the Palace, Her Life solely of attending Heavenly Parent and only to embrace the Love of Heavenly Parent and to achieve Heavenly Parent's Will. It was (and is) a beautiful path. Please allow us inherit that Will and resemble our True Parents's Heart.

The path of persecution and struggle, the path that True Mother is walking, please bestow Blessings upon this world so that path can be a path of victory and Blessing and Glory. (When each of us and all BFs repent and change to be filial)...

In this day of the crimson horse, True Mother's return is coming forward, so please allow this Will to be accomplished, as small candles come together and make up a big fire, may our devotions and prayer come together and shine brighter than the sun. Then the foundation for Heaven to work will be established and the SW will work, and through this please allow this Providence to end a day sooner.

Our True Mother Who is on the cold floor in struggle, please allow our prayers to be warmth and comfort to Her and let our prayers bring about the unification of H Korea and H unified world.

## Cheonseong Spiritual Academy

Testimony

Kim Ju Hi

daughter of Korean/Philippine family and participant of Blessing

Letter to Mother

Mother, Here at the CP Complex winter is deepening along with the chilling and biting winds... Now, after serving 8 months at the Spiritual Academy, I am now preparing to start a new path.

Now, no matter how cold the winter is, March will surely come and a spring breeze will blow as if the cold never happened, bringing flowers with it.

What kind of winter are You spending Mother. I wonder if You are feeling cold, if You are eating well. Are Your shoulders too heavy. I am so curious about Your news, and at the same time, I am so worried. It brings me sorrow that all I can do is pray that You may pass through this harsh winter and welcome the warm spring even a day sooner.

I am writing this letter to be a small light of hope for You midst these dark circumstances and to honestly share how I have grown in the Academy.

On September 28th 2024, after receiving the 12th Spirituality Workshop, I returned to the field and completed 1 year of offering service at the Cheonon Grand Church in time for the Entrance Ceremony.

I tried to endure by promising never to forget the Love and Heart of Heavenly Parent that I felt during the Workshop, but at some points, my body and mind became exhausted. During that time, through Heaven's guidance, I received the third Attendance Workshop, and realized the reason for my struggles. It was because I lacked the heart to surely attend the church embers and the public officials. Because of that, I was always hurt and complained with feelings unable to overcome my limitations.

After the Workshop, I planned to return to the field and continue my service life, but I felt so inadequate. With the desire to grow while practicing a life of attendance, I thought to join the Spiritual Academy. For the first month and a half, I did ansu service at the True Family Consultation Center, and after that I moved on to the Devotion Team, and have been active until now.

When I first entered, I wondered what kind of devotion does Heavenly Parent want from me, that I was called directly to this Cheon Shim Won, looking for something specific I needed to do, and I expected the atmosphere to be very heavy and serious. But when I actually arrived, I was flustered to find members who looked small, like cute chicks. While they were always bright and noisy outside of devotion hours, they are more solid than anyone else when it came to devotion itself.

Mother, I have received so much flowing love here at Cheon Shim Won, team members, academy students who supported each other, and above all there was Heavenly Parent Who Loved inadequate me until the end.

Being at Cheon Shim Won as part of the Devotion Team, I was able to gain realizations every day, and fill my insufficiencies. To my shame, I compare myself to others a lot here. Because the results of the DT were not immediately visible, it was truly difficult for me to move forward quietly and silently with endless devotion. That mindset brought emptiness which eventually led to resentment. That resentment was none other than jealousy and frustrating expression of my inadequacies.

I want to be recognized, but being in a position where no one recognized me, made my heart feel spiteful. Each time, Heavenly Parent would notice my heart and comfort me. Unexpected gifts of snacks, little birds hovering around me and signs I loved during the vigil devotion.

Heaven always comforted me with what some may see to be insignificant things, but they were gifts through my surroundings that made the difference for my heavy heart, and I became certain it was Heaven's Love. When I felt that Love again, I would cry like a child saying, 'How do You know my heart so well, that You take care of me to this extent.'

There were also so many days when I hit my limits of physical strength. There were times when my body was collapsing and I couldn't even manage to eat one proper meal. Lacking sleep while balancing the schedule of both the Devotion Team and the Academy, I once collapsed from exhaustion, but each time I could help but think of Mother far busier and under so much more heavy responsibilities, moves forward without a hint of exhaustion, even while sleeping less than four hours a day.

Thinking of You, Mother, my eyes would fill with suffocating tears at the thought that I must overcome my own limits. Every time I crossed those limits, I realized how small of a being I am. And I was becoming increasingly humble.

When knowing that Mother had already experienced this path before me, I naturally moved to a lower position. And while offering devotion with the team, my path came to appear. I embraced the mission that I must grow further and go out to the world, realizing this was the Will of Heaven.

I challenged myself again and applied for admission to UPA. I recall the promise I made to Mother. 'I will offer my whole life to You.' For me, these were not just lyrics, but a promise I made to Heaven, Mother and myself. I offered devotion for Mother while waiting for the UPA results. On the day of the announcements, I checked with a trembling heart and saw that I was fifth on the waiting list.

Frustrated by the number, I prayed to Heavenly Parent, 'It's okay. I will accept this as a sign to complete one full year at the Academy.' People told me to check the additional admissions, but since I had already given up, I spent my day telling people that I had already failed. Then as the hectic schedule continued, I forgot the date of the additional admissions, and perhaps due to exhaustion, my body eventually collapsed.

The very next day, while thinking, 'I must have failed because my body is like this,' I received the call from Sun/Moon University Admissions Office around lunchtime, even though it was already two days passed the original date, and I had no expectations at all, it was the news that I had been accepted into UPA. To Heavenly Parent I asked, 'Did you not see me collapse? Will You still use someone like me? Is it still okay?'

Then later I heard True Father's Voice, 'I am not sending you to UPA for no reason. It is so that you may attend Mother well.' From that moment, I was able to take hold of my heart once again. When I concluded my academy activities, I prayed to Heavenly Parent, 'I have invested myself for Mother with hard work

and no regrets. However, I feel regretful and sorry that no exceptional results were manifested.'

At that time, Heavenly Parent said, 'No. And Heavenly Parent showed me one-by-one from Heavenly Parent's Perspective the small ways I had invested myself. Heavenly Parent cherished even those small efforts, keeping them stored in a beautiful picture frame boxes.' Only then, I realized that each and every investment I had taken for granted was something that brought great Joy and Gratitude to Heavenly Parent.

Realizing that I was receiving such love made me a truly happy person. Even though I am so inadequate, Heaven has continued to guide me toward Mother.

Mother, how much have You exerted Yourself to raise the 2nd and 3rd gen children? If there is one way I have grown compared to before joining the Academy, it is coming to know that my prayers and practices are still lacking compared to the Love I received from You, And my heart toward You.

Also, during my 8 months doing service on the Academy and Devotion Team, there were moments when the devotion felt like work rather than a mission. Every time that happens, I ask myself again what the essence of the Academy service is, and why I must be in this position. My final destination is to attend You, Mother, right by Your Side, and then I look again at the path I must walk and how I must change more than yesterday, and move one step closer.

Whenever I wavered I obtained answers from prayer at Cheon Shim Won. Mother, thought I still may be very inadequate, I hope that You will smile brightly as You behold me growing and moving forward. I will become a jewel solely for You, and to bring joy to You, I will invest myself even more diligently from a lower position and with a greater sense of responsibility as a Seventh UPA student.

I will believe that the sun will rise again. I will become Your sun and Your spring, until the day You return again and meet us, Your children, until then, I will not change. So, please, listen to this letter and find a little more strength. Mother, I love You. I thank You and conclude earnestly praying for Your long life. Kim Ju Hi

**Shin Ji He**

Training Director 6th Attendance Workshop

live dormant but eventually attended 40-day Workshop thinking it would be the final chapter of my

efforts with the church, but it was so moving that I joined the 10th Spiritual Academy and was appointed the coordinator, without having received the program myself first... I had to create everything and lead also, and I thought I might diminish the grace and spent night awake with apologies for Heaven.

At the time I did not really know what attendance meant, but the simple thought to treat the trainees with love, but without a precise purpose, I face fallen nature in a process of coming up and emptying it and having it rise again, I thought with self reproach and regret, 'So, this is the person I have been.'

Facing inadequacies and limits, the thought of wanting to run away occurred to me countless times, questioning, 'Am I qualified to stand in this position?' As the Workshop entered its middle phase, I was given more responsibilities, and the trainees were also going through their most difficult time, spiritually and physically. As soon as I opened my eyes, I had to run to trainees contacts, and there were many days when I prayed while running, 'Please let the trainees' minds and bodies not be in pain.'

It was a period that desperately required intensive care, such as cleaning up trainees vomit, and listening to their circumstances. For me, the hardest was when my own fever rose to 38.7 degrees Celsius, requiring an IV drip, after which I immediately deployed back to my duties.

It was by no means easy to painstakingly take care of each person and perform all assigned tasks, while unable to even attend myself. My past 40 days were a time like a war. Only then did I desperately feel that this is a path I can never walk alone. It is a path where the cooperation of the SW is absolutely necessary. I felt the position of a coordinator is not a glamorous role defined by visible capabilities nor a path of spiritual discipline that replaces the path of indemnity with practice for the sake of the Will.

Even before tasks, I felt incompetent to do or did not want to do, I had to stand with confidence before the trainees with Father's direct education, the part of a H mediator established by Father.

I struggled not to forget that every single one of my actions was in a position that could be accused by dark spirits, but that path was so difficult. Toward the end, there was a program called, 'Moshimggi' or 'Recording Attendance'... It was a time to record our experiences of attending, interview others about theirs of past and present findings. And at that time, a trainee interviewed with me and asked, 'What do you think moshim attendance is?' In the end, when I thought deeply, it was one word, 'love.'

I thought that because I love, I could approach them. Because I love, I could serve. Because I love, I feel responsibility and could attend them. But still I couldn't understand why my fallen nature was constantly being reflected. It was during the final Hoon Dok Hae session and attendance devotion time, after completing 43 bows and 300 calling out prayers, that I offered the final prayer of the 40 days.

The moment I asked, 'Why did You entrust so much work to me who is so inadequate, who has only just come to know You and has just started? Did You really have to educate me to this extent?' The realization came that what I had been giving was just love, but in the end what Heaven wanted from me was true love, centered on Heaven.

I realized that Father had given me a path of trials and tribulations until I understood, just to teach me the meaning of 'true'. I came to know once again how important it is to center on Heavenly Parent. Furthermore, I finally understood that if True Parents had not truly forgiven, truly united and truly loved until the end, even through the moments of being rebuked by all people... if there had been even a single inch of a gap, They would have been in a Position where They would have been constantly threatened, not only on this earth, but also in the SW.

I felt with my heart, not only as a concept, how deep and heavy the word, the single word 'true' is. And upon that grace, sacrifice and responsibility that 'true' attached to the Parents' Names is established. So, when I offered a prayer of repentance saying I would center on Heaven once more, I was given the opportunity to serve as a main coordinator of the 6th Attendance Workshop.

To me attendance was ultimately 'true love'. I also realized that as much as we wanted to attend True Parents, True Parents also wanted to dearly attend us as children. Just as the essence of an apple does not disappear from an apple tree, there was a period when I realized that our essence as Heaven's children does not disappear either.

With this opportunity given by Heaven, I will move forward with a life of challenging, not a life of giving up because I'm inadequate, but a life of trying... trying to live a true life and returning filial piety.

I, Jin Ji Hai, resembling the true Heart of True Mother, until I find H teachings for myself, will stand as a Training Director, or Main Coordinator of the 6th Attendance Workshop, truly attending H and taking responsibility for H's children until the end. Heavenly Parent and True Parents, I 'true' love You.

## HJ Report

281st Korean 40-day

He greets and bows

True Parents's Words: In the course of the 40-day Workshop, you must become sons and daughters of God, true s and d. Because human beings brought sorrow due to the Fall, you must be reborn so that you may become a self who brings joy to God, even when God faces you with hope. You must say that you will take R of all environmental factors that could make H sorrowful, and become a filial child, a 'hyoja'. You must become 'true' s and d of God.

Our elder members inheriting those words also inherited that tradition to us. And like the lyrics of the Monarch Butterfly, even if this harsh world is before us, we will walk the path that is the duty of the child, (upon the foundation of our Parents) even as this CP is on the foundation of True Parents, True Father holding the pick ax. And we had many miracles happen... and our lecturers are changing from 1st to 2nd gen.

Principle of Creation is now trying to center on lifestyle Principle and expand the True Parents's Life Course with more accomplishments of our True Parents and the topics and WSs about the completion of the 3 Great Blessings.

Members were distance until now and had questions and wanted answers to them all, and afterward they

would explain with scientific principles and realized that refusing the church was because they refused to know, but with the scientific answers so clear, I felt proud and wanted to be a woman like the lecturer.

As we develop our lectures, 174 participating with the greater quality. They are understanding why their parents lived a life of faith and the # declaring to follow their parents is increasing and now trainees receiving 120 and other WSs. One-heart resonance prayer is very graceful, done once a week at least and one member talks about their situation and the others put hands on and pray...

Tears did not stop until the resonance prayers of all the members stop and it was like the tears of Heavenly Parent always with the members and by their side, but the tears felt warm and comforting and happy to realize that these really were my elder and younger sibling given by Heavenly Parent... and grateful to experience...

another... initially reluctant because I had not affection, having built up walls, but practicing I realized Heavenly Parent's Heart and wanted to give a warm hug and apology and deaconess took my hand and it was so warm and now I look at all b and s as Heavenly Parent would look at them..

Video

father dies and came to Workshop with younger siblings, and as I pursued by career, I was engulfed by the culture of the secular world, but with my father's illness of cancer I came back and he said his will to go to the 40-day and I stand here now, and I resonated with the other members and shed so many tears as we prayed for others circumstances as our own and astonished by the mingling of tears...

But still did Heavenly Parent really love me and why I experienced rejection and why... I thought that Heavenly Parent loved others more than me, and every time I cried out, 'What is the Heart of a Parent calling me so inadequate and how can I achieve what You want' and for the first time I could understand that Heart of Heavenly Parent through the life of my parents and now Heavenly Parent will not look upon me with sadness but happiness, I made determination to become a artistic cultural heart meter and be a proud filial child of Heavenly Parent.

Through prayer and various lectures, many could experience the Heart of True Parents and go back and change their families and volunteer at the churches...

Kim Min Jun, medical 2nd grade, and (this person related to them) had depression... attended Workshop... and another 'The True Parents have educated us with love'... the Parents forgave me and guided me here... until now repulsion to the words 'I love you'... It felt awkward and uncomfortable to say it or her it said to me... but now I can say 'I love You to Heavenly Parent and True Parents and all people' and I will live to love... I sincerely love You... TY

another... 'Can I die for my husband, who lived a life of faith but now left for another religion and hurtful words came out that if I don't follow, we would have to divorce with young children, and had han for that church and to resolve it came to this Workshop...

When she came fully participated and 2nd night, a song of God's zeal I listened to over and over and what more can I do... 'My beloved daughter, will you wait for Me. Thought it may seem a bit slow, will you wait for Me, for I have not forgotten you prayers and tears' 'I was listening to you' and my whole body felt warm and tears would not stop.

True Mother Who gave birth to 14 children and True Father even in position of vomiting blood. I called

out Aboji and Omoni... I had a small confrontation with Heavenly Parent 'What would you do if it's still difficult?' 'I will try harder' after 3x it occurred to me that he would not return until the day he dies, and in that case, I determined to walk this path even if I am alone. Then I heard, 'Then who would save my son?' And even though he denies and insults and blocked path for our beloved children, do You still call him Your son?'

The answer 'I will love him with my life until the end.' Now a cross hangs in the living room and I plan to purchase a Hyojong won and show this and resolve the Han by witnessing to HMH to those who love Jesus so dearly... So, although the husband is another religion, let us applause for encouragement for the husband to come back...

If we resonate with Heavenly Parent, then the final is prayer toward Mother, to offer devotion and prayer and witness... and many projects going to the DC... When one went heard the voices of inmates coming through the loudspeakers and thought Mother must be listening to this every day and I will not hesitate longer...

Itinerant missionary I Gwon U had a dream that all the bricks imprisoning True Mother are our fallen nature... I saw this in my prayer. I received the answer that, 'For Heaven to work, and for us to tear down those bricks, we must be reborn and resolve to evangelize HMH, True Mother OBD. Through this Workshop I felt the most thrilled and excited when talking about witnessing, which is both Heaven's and my own desire... And I also must witness to myself.

---

### **Break**

---

### **Hoon Dok Hae**

The miraculous life achievements of True Parents were through forgiveness and love. We must become a living truth where the truth and the world and the spirit become one. The question is, 'How to preach the words of the Principle every day without ceasing to new people, leading them to Blessing through 7 and 21, or 40-day WSs, producing many Unificationists of a living, breathing and vibrant community, offering much devotion, not letting any word of Direction of Heavenly Parent and True Parents fall to the ground (NOT LETTING MOTHER'S ANY DIRECTION BE UNKNOWN AND/OR FALL TO THE GROUND replacing it with our own will, our own idea.) That is the Center of our unity and God's Will done.)

For the sake of God, True Parents forgave even the unforgivable, and for the sake of humanity, they loved even Their enemies. Forgiveness and love have great power to open a person's heart, and love moves a person. The miraculous Life Achievements of True Parents were cultivated through a Life of Forgiveness and Love. They said then there can be reconciliation where there is fighting, harmony where there is dispute and peace where there is war.

You must know how precious this point in time, this very moment is. Joshua and Caleb were both descendants of noble families. They remained loyal before Heaven until They reached an old age. From

Caleb's perspective, he lacked nothing. Yet he became one with Joshua. He did not boast of himself, but put Joshua forward. Because of such a foundation of restored Cain and Able, the Messiah could come to the people of Israel.

Looking at our leaders, a culture of loving and boasting of one another has not yet taken root. It must be stronger than any other organization in the world. From now on, I wish to create this environment through you. Do not only try to become high yourself (thinking of your own position and how to take credit to yourself, considering your own leadership the best and your own thoughts trustworthy. Then the whole cannot grow securely with lasting fruits)

If you live for each other, nurture the other, bolstering the other, the whole can grow. If you move at all self-centeredly, you diminish. If you actually heed and bolster others, you develop. Actually, no one should suffer because of you. We are people who must save live, embracing our global brethren with love.

### **Pres. Lee Gi-seong's Message**

At this 1,496th Cheon Shim Won, 42,400 members gathered and 4PF True Father and many leaders, I am grateful...

Pres. Moon Im Pyo is here... welcoming applause... coming at about 10pm but still came here...

There are many things you could criticize, but please try to understand motives behind devotion and think of the SW that could say how we lacked even 1% and even I think sometimes that our devotion cannot satisfy SW, and let us try more to be accepted in the eyes of the SW...

If the Workshop wants to work but you lack 1, or 50, or 90%, what can we do... In this world we can make many criticisms, but in the SW they see very clearly and you must also be able to see the great ways possible for works of Heaven that you do your best on this earth...

(testimonies revisited)

so heavy responsibilities of the coordinators, but realizing only by the help of the AGSs and Cheon Shim Won \*'s can we humbly accomplish...

Moshinggi... offer prayer and gratitude but without love, you cannot attend and pursue the 'true' love of Heavenly Parent and True Parents... Even sometimes people complain how long the chanting is but others say it is not enough for the release of True Mother... and you and your family feeling lack of devotion can continue more at home... If you feel and express gratitude with everything, we can live in harmony... With criticism, becoming one is very difficult...

You must remember the devotion to offer with such a heart that it is not enough and live what tries always to fill that lack, not be satisfied, so that H can work through you more.

The greatest realization is the weight of the word 'true'. Attendance is true love. Who attends the best. We see that a mother attending a baby is the best attendance, because it is with everything that they have. And if you attend a Parent as you would attend your own child, then you become a true filial child.

Today True Mother, although enduring such hardship, She offers devotion for all of this world and in turn receives suffering... Let us inherit that heart and attend those around us with true love so that H will bestow great blessings

The motive was to set down the strongest roots of faith... They are trying to prepare the spirituality Workshop in America and asking many to come that the holy fire can be ignited along with the dispatchment of the Spirituality Workshop trainees.

I received the message from NJ, despite the negative below zero temperature, the grace was almost equivalent to GWs... at the university... At the Spiritual Academy such strong bonds that can be also future strength and grow your skills and competence. While praying, shouting Aboji and Omoni and those who shout their prayers are also from the Spiritual Academy as we offer prayers and presentations and leading people and leading praise and today's reports.

Dr. Hong Yo Wong is 2nd gen very young actually, but how great a presentation and how prepared he was for it. So to enroll here and go out, you can become a great leader of many... and offer lectures and presentations and take that to your respected site and use that competence..

For our churches to grow, our leaders must grow with the standard of AFL and O, entering such a position (not just a respected title)...

video of Chan He Dong's testimony, while father receiving therapy made his death wish to go to 40-day and also receive the Blessing...

We need to have such people who believe in and understand the SW... and we need the young people... and know how precious this time is... True Mother once told me that Caleb is the greatest figure and fulfill the mission of Caleb, who lacked nothing but not boasting of himself but putting forward Joshua, and that was the foundation but that has not taken root here, loving and boasting of others, forgetting ourselves... The Heart of Caleb must be the heart of our leaders... and attend the 40F of True Father like Joshua

and we must not spread and advertise the criticisms to those who think we are a cult, don't express it like such a great problem. If you truly love this church, walk the path to become one BY PUTTING Heavenly Parent AND True Parents'S HEART AND DIRECTION at the Center WITH LOVE FOR THEM bolstering Them, not ourselves... and attending those hard to attend so that a path to greater glory is opened (not only criticizing the person hard to attend, but holding one more bag so that others can hold less bags) True Parents lived Their whole Life like that, giving and with the Heart only to give more...

No matter how we try to boast our True Parents online or on the street, we always feel something lacking,

so we must spread the good news of our church and True Parents, and stack up how much we are able to boast about that is there, but not to do that while complaining and resenting... Our life cannot be reversed, and how will we look on our past.

True Mother, said even if She thinks of Herself what is truly great, 'I Myself am Amazing', you must be able to say that about yourself before Heaven, before Heaven... And we must say this church is amazing and I myself must make this church even more amazing...

Those who serve the most in the SW, are not those who aged the longest, but those who are the martyrs... who died young... And that is why HyoJN is guarding the door to Heaven and you must receive his approval, not of an angel but HyoJN, and looking upon that True Parents... There is a door that determines whether you are a filial child or not... If you lived long but not really bolstering True Parents, they will say, 'That person is wearing the holy robes, but came here? Strip them of their robes. Judgment like this is waiting in the SW. Aju?'

After the Seonghwa ascension ceremony, SW judges your entire life, what about the inner if there is a messy or darkened aura, you will want to hide and say, 'Hide me'... If you wear such attire, you must live according to the attire.

Our True Father said, 'Being embraced by glory is Heavenly Parent's grace and is His grace and with tears we register as tribal messiah, Cheonshim family, the name of you... Even if you fill each day with wailing, you must feel regretful not to live up to your name...

Because we are still lacking, True Mother walks the path of difficulty...

---

### **Calling out / Fight Song**

Chanting

---

### **Prayer and Praise**

Each and every moment of our True Parents's Life of our HMH's Life is more precious than anything to conceive of... Let us expose and release the chains of our own fallen nature and let all the children that You chose gather as one and face this world of darkness that the 6,000 years of True Parents suffering come to an end and Their Wish, Your Wish our own true wish be achieved upon this land...

Let us overcome the ignorance and unawareness of the Epic history and how the Korea is the chosen... Let us fight until the end for Cheon Shim Won devotion and actual result of attendance on earth...

Jesus Christ, as He is the blood of Abel, allow us to carry the weight of Mother in Her Place, even now 141 days still not changing more responsively to resemble Her... Please work for us to release True Mother from her worries about our failure of responsibility to help True Mother at such a time as this... Let us feel the Heart of Sadness You Posses, Heavenly Parent... Let us offer devotion with our lives and please accept it.

Now BFs around the world are becoming strong and bold, and now let them in place of Heaven and earth be the H soldiers brave and strong, even if the bodies die and die again, let us become like Caleb with Jacob. For that glorious day we can celebrate with HMH, please intervene, correct and guide us as we bolster and praise Shin Chu and Shin heung nim and 4PF True Father... Please let us lose ourselves, please keep the health of especially those in front of the DC... and for Mother's long life and health...

gratefully in attendance to HMH, a BCF in my name of Pang Sang Il
