Inaccurate Automatic Translation

Good morning to you

I hope you're doing well

1497th Tianxin Garden is sincere all night

### Summary

The reason why everyone survived safely in the past helicopter accident was evidence of the fishermen who said that angels supported the helicopter your father was riding in, and they prayed with earnest prayers so that we could transmit our sincerity to the heavens. Mother's hardships, who passes through the day in choking pain beyond our imagination, can be said to be the path of decline she is undergoing on our behalf.

When we emotionally work our best in our hearts that we are going through hardships together in our mother's small space, we can become more united with her feelings. Even when we eat, if we always provide with our mother's feelings, I believe that everyone's spirit standards will improve surprisingly

during this period.

This time, 596 trainees came from Kami Japan, which is the number to fill for the hardships of Konan by their father. The number of participants so far is strangely 1943, the same year your mother was born. If this member prays in consonance with heaven, I believe that heavenly affairs will arise and no matter how strong the devil's bow and arrow is, they can blow away.

Today's reading of the day is "You have to go 100% to the spiritual experience. They teach you to study your professional field on such basis and you can make endless development in that field. ". In order for us to live up to Mother's expectations, we need the diligence of the underworld to assist and receive the role. The 21st century is truly the era of true parents, the era of spirituality, the era of true love competition and the culture is established in this land. In order to achieve this, the training of Kami Nippon Tenshin Resonance Prayer became an important practice. If these members spread and resonate throughout Japan, they will have the power to activate prayers. Resonance is the power of official prayer.

Proof of a Shuyo student: He suffered various pains from ringing in his ears and blind eyes, and was having difficulties with spiritual vivid dreams, he entered the 40th day training session. The first three days were really difficult, but when I worked my best to dismantle the central spirit, I was filled with tears and moved, and I was able to overcome illnesses such as depression, Meniel's disease and make a new beginning. He decided to undergo 40 disciples of spirituality in the future.

Knowing that the Heavenly Parents are more unfortunate than the unfortunate ones who suffer the most hardships in this world, if it is for Heavenly Parents, even if it is by peeling my skin and squeezing my marrow, I will surely fulfill your will, and the path that the true Parents, who have devoted themselves all

their lives for the release of Heavenly Parents and the release of their ancestors. He walked not thinking about himself, but only the heavens and His will. When we have a problem, we put ourselves and our family affairs before our will, and we become instruments of judgement.

If you end up being a personnel in the spirit world, don't wonder why you take me, you still have to be grateful. Considering only the fact that I received too many blessings and many good things in my years, I must prepare only a bath of gratitude and go to the spirit world. The very last and greatest practice in life is at the time of Seiwa, our pain now is small compared to the practice just before Seiwa. Even in difficult, exhausting and difficult situations, create content of gratitude out of them. I'm grateful that your mother is in jail and we can pray for a true prayer. The First Churchmen prayed fervently every day, believing fervently that Jesus, who died carrying his cross, would come soon. If we pray earnestly, believing that our mother, who is on the cross for our sins, will soon come out in power, then all the good spirits of the first generation will work miracles. Many miracles have happened before, many more miracles are ahead.

Since the era in which the Creator Heavenly Parents ruled as an entity has been opened, we have the responsibility to work hard to ensure that miracles happen by the Heavenly Parents' officials in order to make this world a united world of freedom and peace. It is not possible by human power. Since the heavens directly ruled after Tenjogu Shrine entering the shrine ceremony, I hope that such phenomenon occurs zealously will work hard so that the angels will protect the mother in the detention center like the angels covering the crashing helicopter, and the underworld will mobilize all the people in order to release the mother, and many righteous people will support their parents without considering their own circumstances.
