

UPF USA: Korea's Shrinking Population -- Webinar Tues 2 PM EDT

Larry Moffitt
March 29, 2022

KOREA'S SHRINKING POPULATION: HOW FAR TO THE TIPPING POINT?
Tuesday, March 29, 2022: 2 PM EDT

Dr. Nicholas Eberstadt
Henry Wendt Chair in Political Economy, American Enterprise Institute; Senior Advisor, National Bureau of Asian Research University

Dr. Lee Yoonjin
Professor, Seowon University, Seoul, South Korea; Former Research Fellow, Korea Institute of Child Care and Education

Ms. Lee Sunjin
Doctoral Student, Sun Huk UP Graduate University, South Korea

Dr. Staffan Berg
Coordinator, International Association of Academicians for Peace (IAAPP) USA

Dr. Michael Jenkins
President, Universal Peace Federation; International Chairman, The Washington Times Foundation

The South Korean (ROK) birth rate is among the lowest in the world at 0.9 (2019), while the 1.9 (2019) of North Korea (DPRK) similarly indicate fewer kids and an aging population. Less people might be good for the environment and encourage migration, yet provide social and economic challenges. While governments mobilize legal and financial resources to control the situation as in North Korea, ultimately young couples must birth children. Sampo is a recent South Korean label for those who give up on courtship, marriage and children. The panel will discuss some of these dynamics and possible paths forward.

Sponsored by the International Association of Academicians for Peace of Universal Peace Federation

Korea's shrinking population
How far to the tipping point?

Tuesday, March 29 at 2 PM EDT

The South Korean birthrate is among the lowest in the world at 0.9 (2019), while the 1.9 (2019) of North Korea similarly indicates fewer kids and an aging population.

Shrinkage has a known tipping point, beyond which a nation cannot recover.

While governments mobilize legal and financial resources to control the situation as in North Korea, ultimately young couples must birth children.

Sampo is a recent South Korean label for those who give up on courtship, marriage and children.

The panel will discuss some of these dynamics and possible paths forward.
