Special Report on the African Tour and Leaders' Meeting

Cheon Jeong Gung

On this day we are grateful to our Heavenly Parent and our hearts are filled with joy. In the course of Heaven's sorrowful providence of restoration to save fallen humanity, God finally established the True Parents who conducted the providence for 60 years together. On that foundation, through True Mother, the only begotten Daughter, Foundation Day was proclaimed and the new era of Cheon Il Guk opened.

The True Parents must show what Cheon Il Guk looks like. It is the Creator's dream to save and embrace all fallen humanity through the True Parents. God wants to embrace all people as his children. Nevertheless, looking at the history of the providence of salvation, its development has been a result of Heaven's arduous work. The point is that Heavenly Parent's dream is realized while True Parents are on earth. Considering such a providence under Heaven, how serious I have been! You cannot imagine.

Knowing Heaven's wish... Although Christian culture has spread across the globe from the places where it developed - such as Europe and Asia - the continent that God most desires to embrace and love is Africa, where there is poverty and where people face difficulties in life. The Unification Church providence is also very weak in Africa. However, I wish to show something to the world through Africa. When I said I would go to Senegal in Africa and hold a summit, the executives were not in agreement with me due to the very poor foundation we have there.

However, I knew that there were righteous people, leaders whom Heaven has raised up in this struggling continent, and who could move Africa with their heart for God. Therefore, I pushed for the summit. I pushed and the Africa summit was successfully held; and we achieved a regional-level triumph in Niger.

These countries were not Christian, but Muslim. I therefore saw more possibilities.

When the one who is first feels shame and repents through the one who is last, this opens the way for them to come to God. Thus I connected three righteous people as brothers among Muslim and Christian religious leaders. As instructed from our headquarters, they are now educating their congregations about the responsibilities of CheonBo couples and putting them into practice.

We have sown seeds. As we continue to plant seeds, we must also nurture them. We need to care for them. The way to progress is to bless religious orders and nations, that there may be fruits that God can be proud of - sons and daughters who are victorious CheonBo and who are qualified to be citizens of Cheon Il Guk. Through this visit, Director-General Yun Young-ho reaffirmed this path and has fulfilled an important responsibility in building Cheon Il Guk on solid rock.

Next year, we will dedicate the Cheon Won Gung Cheon Il Sanctum to God. To fulfill God's dream on earth, surely we must further expand the environment. Africa is leading the way in this regard.

You must now become leaders who can demonstrate this to this people, to this nation, and to the world. Results rather than words of proclamation! You must become reapers for God. In such a situation where it is impossible to predict the future, this government and this people must listen to the voice of God.

They must revere God. Otherwise the future of this nation cannot be assured. How should you proceed if the situation is so desperate and urgent that there is no time to waste?

In that God has had compassion for the continent of Africa and developed an amazing providence, now your devotion and effort should move Heaven, shouldn't they? Is that right or not? [It is right.] You must show it not just with your answers but with action.
