Declaration of Chile

Blessed Families of Chile

To all Blessed Families in Chile, Latin America and the World

- We are families who follow the voice of our conscience and original mind, therefore, we are not dependent and are not followers of a representative, bureaucratic, and institutional faith that could prevent us from developing the ability to be Owners of the Providence and as citizens transform our country into the nation of Cheon Il Guk from its constitutional foundations and democratic context.
- We believe in the establishment of the True Family and that our responsibility is to support her and protect her without discrimination and prejudice, for which we do not allow the reversal of dominion nor the multiplication of evil through false testimony, as we also do not follow the directions of leaders who seek to divide and accuse the True Family.
- Moreover, our True Father declared the end of the Unification Church because he fulfilled certain providential goals and thereby established work at a Federation level, which is very different to the functions and work of a traditional church. We believe that the current leadership clinging onto the position of the Church violates the legacy and the tradition of the True Family, suppresses free action and the expanding of our ideal, as it also abuses its authority and manipulates the Faith, with the end to hold onto positions, generating fear and trying to create loyal followers who cling to an institution.
- Therefore, confronted with the rapid cultural and structural changes that our complex Chilean reality presents, it is of utmost urgency to restore the Family Federation by moving from the position of church to an association of families and open to society with new and innovative methodologies of work, leadership style, alliances, and management teams, generating our own funds for our activities through access to resources from the government and the private sector.
- As children who are heirs and successors of the providentially victorious foundation of our True Parents, we define our position and mission in the Era After the Coming of Heaven, where the ideal of One Family Under God and the establishment of national models can be realized. Therefore, we are confident that promoting a vision of peace based on universal principles and values is fundamental to open the way into various communities and to raise Chilean Blessed Families to work with different actors and sectors of society in different areas to generate testimonies, create impact and to produce true change in our nation.

In honor and defense of our tradition, principles, and ideals we state the following:

1st – A great part of the Blessed Families in Chile will exercise their decisions, actions, and associations in a territorial, democratic and autonomous way, free and responsible, as true owners of the providence of God and as Citizens of Cheon Il Guk.

2nd -- As extended members of the True Family, we will protect the legacy of the blessing and the lineage of True Parents through re-claiming and positioning the True Family as the vertical axis of the providence, without prejudice, divisions, and false testimonies. And we will not tolerate and will not allow any evil act that separates the True Parents from the True Children nor acts that fragment the True Family.

3rd – We will align every human organization, resource management, education and institutional structure, to the content and directions of the providential Era After the Coming of Heaven set by our True Parents.

4th -- Based on the vision of peace and One Family Under God we will develop activities, projects, and programs in cooperation with stakeholders and sectors of society. And make of Chile a model nation that has God as its center and as its Sovereign for Latin America and the World.
