

Who Will Have Dominion over AI?

Richard A. Panzer

Do you not know that we will judge angels? How much more the things of this life! 1 Corinthians 6:3

You should be a person who can establish the Heavenly Kingdom rather than just the one who can go there. Those who can go to heaven are those who wish to be dependent on God, but those capable of building the Kingdom are those who can let God depend on them. SMM, "The Way of God's Will" by Sun Myung Moon, (Chapter 1-8. Kingdom of Heaven), 1980.

Hello,

Newfoundland Sanctuary Pastor Kyle Toffey played a video about AI. At the World Economic Forum several speakers view it as a great economic boon. Others are concerned we're giving it too much power.

AI = Artificial Intelligence. It is designed to assist humans with compiling a lot of information very fast. Artificial means created by human beings. Intelligence is the ability to acquire and use knowledge.

As a computer programmer Kyle used to work with very large database systems 20 years ago at a company called TerraData. Computing power and data size are growing exponentially. AI analyzes patterns. The data comes from us. Our texts, emails, social media posts. When we use our car, buy something, etc.

Sanctuary Service 6/7/2026

Computer systems on 2027 cars are observing us and can shut off engine if the AI decides we are not driving safely. It predicts buying behaviors. Be careful what you post or write since all of that becomes a permanent record. The key question is who is controlling this data?

Mike Adams, the Health Ranger, has his own AI which compiles his research and books on health and survival. The question is how is it used? AI is used in areas like business, health and science. Ideally it would tell companies how to serve us better in order to keep us as a customer.

Banks are now able to connect the fact that you have different bank accounts. That knowledge could lead to an offer for a credit card with a better rate. BUT, it could also be used for surveillance like in China, where they removed access to transportation or to bank accounts for those with a low "social credit" score.

CBDCs aka Central Bank Digital Currencies are government-controlled bank accounts. Critics warn that CBDCs can be misused to coerce or manipulate behavior. Or punish disapproved political opinions.

Or for predictive programming. Under the Biden administration the government apparently were keeping an eye on that dangerous potential terror group: white, male Christians.

What is AI from a Godly Viewpoint? God gave Adam and Eve 3 blessings. As noted in Genesis 1:26-28 and discussed on page 31 of the Divine Principle we were created to be rulers over creation. As 1 Corinthians 6:3 states, "Do you not know that we will judge angels? How much more the things of this life!", we have the authority to judge the angels. We can pray to mobilize angels.

AI have access to tremendous amount of information, akin to an angel. We are the children of God, not the servants of God. Love, not intelligence, is the main issue. Our challenge is to grow in our ability to love.

Lucifer knew more than Adam and Eve, but his role was to serve. Adam was tasked to name and value things. God didn't give the commandment to Lucifer, but instead to Adam and Eve.

We need DI- Divine Intelligence. From the one who created us. In order to receive that, we need to ask., study God's words and the natural world.

The King of Kings and the White Dragon movie

May God bless you and your families!

Sincerely,

Richard

"Sanctuary Church" is short-hand for "World Peace and Unification Sanctuary" which is from calligraphy on a scroll presented to Hyung Jin Moon by his father, Rev. Sun Myung Moon. The purpose of the "World Peace and Unification Sanctuary, Inc." is to "preserve and propagate the Biblically-based teachings of Reverend Sun Myung Moon."
